

# Mitsubishi-Hitachi Metals Machinery, Inc.

2005/8/19

Messrs;

Line:

Start-up year: 1986 年, 1989 年

Years after start-up: 18years, 15years

Type of HYROP: 3CPU-HYROP

Roll Position Control Panel (HYROP-F)

Request for the Purchasing of Spare Control Unit for HYROP Panel (3CPU type)

(Notification of the discontinuance of manufacturing CTU-02

And Investigation of its final manufacturing lot)

We would like to thank you for continuous cooperation.

Today, we would notify that, due to shortage of LSI, we decided the discontinuance of the control unit (type: CTU-02) for HYROP panel (3CPU type), and started to deal in its succeeding type (type: HYROP-PC4).

Though we are making efforts for supplement of the spare parts for 10 years after its supplement, there might be not able to supply them immediately when you need. Therefore, we would ask you to order us and stock it.

Besides, please refer to the enclosed catalogs of the latest type (PC4) for your study.

We appreciate your understanding and cooperation.

Sincerely yours,

Mitsubishi-Hitachi Metals Machinery Inc.
